What does the Canadian Journal of Surgery mean to me, a community surgeon?

The Canadian Journal of Surgery (CJS) now in its 50th year of publication has survived despite all the odds — and in my opinion rightly so. This indexed publication with contributions from general surgery, orthopedics and vascular surgery is one of the few remaining journals that appeal to the “generalist” surgeon. True, “cutting edge research” mostly gets published elsewhere, but the CJS with its potpourri of articles “tells it like it is” in Canada. Even though I may skim most articles, I come away with a sense of where the trends are going in related specialties. Authoritative editorials/opinion pieces by respected colleagues tackle some of the knotty issues of the day in surgical practice or the medicopolitical scene.

The recently introduced and very popular Evidence-Based Reviews in Surgery assist one in honing critical appraisal skills and help to demystify statistics, while at the same time encouraging one to think about an important clinical topic.

Surgical Biology for the Clinician encourages reflection on the underlying mechanisms of disease. The case notes often stump, delight and teach me — sometimes through the “but for the grace of God” principle!

Resident research is strongly featured, and many of today’s leaders got their feet wet for the first time publishing in the CJS. Those who have the privilege of reviewing articles for the journal before publication have the opportunity to influence content while interacting at arm’s length with the authors.

The CJS is celebrating an important milestone and deserves our continuing support both as readers and contributors.

G. William N. Fitzgerald, MD
Department of Surgery
Charles S. Curtis Memorial Hospital
St. Anthony, Nfld.

Congratulations CJS

The Canadian Association of Surgical Chairs (CASC) wishes to sincerely congratulate the Canadian Journal of Surgery on the occasion of 50 years of publication. The Journal has provided an outstanding service to the Canadian surgical community and represents a critical means by which to disseminate relevant observations in surgical practice and science to Canada’s surgical community.

The CASC takes particular note of the origin of the Journal’s original mandate to attract observations of clinical and scientific significance from the Canadian surgical community itself. The original editorial board of the journal comprised the chairs of Canadian university surgical departments. In view of this historical perspective on the Journal’s oversight, we wish to renew our commitment to supporting the Journal’s efforts now and into the future.

Canadian Association of Surgical Chairs:
H. Jaap Bonjer
Head, Department of Surgery,
Dalhousie University, Halifax, NS
Alan Casson
Chairman, Department of Surgery, University of Saskatchewan/Saskatchewan Health Region, Saskatoon, Sask.
John Denstedt
Chairman, Department of Surgery, University of Western Ontario, London, Ont.

Mostafa Elhilali
Chairman, Department of Surgery, McGill University, Montréal, Que.
Yves Fradet
Directeur de département, Programme d’urologie, Université Laval, Québec, Que.
Douglas Hedden
Chairman, Department of Surgery, University of Alberta, Edmonton, Alta.
John Kortbeek
Chairman, Department of Surgery, University of Calgary, Calgary, Alta.
Gaétan Langlois
Directeur, Département de chirurgie, Université de Sherbrooke, Sherbrooke, Que.
C. Dale Mercer
Chairman, Department of Surgery, Queen’s University, Kingston, Ont.
William L. Orovan
Chairman, Department of Surgery, McMaster University, Hamilton, Ont.
William Pollett
Chairman, Department of Surgery, Memorial University of Newfoundland, St. John’s, Nfld.
Eric C. Poulin
Chairman, Department of Surgery, Ottawa Hospital, Ottawa, Ont.
Bill Rennie
Acting Chairman, Department of Surgery, University of Manitoba, Winnipeg, Man.
Richard K. Reznick
Chairman, Department of Surgery, University of Toronto, Toronto, Ont.
Luc Valiquette
Directeur, Faculté de médecine – Chirurgie, Université de Montréal, Montréal, Que.
Garth L. Warnock
Head, Department of Surgery, University of British Columbia, Vancouver, BC
