#### Neuromonitoring Survey Questions.

1. What do you consider your 'home' specialty?
2. Do you regularly use neuromonitoring for surgeries that place neural structures at risk either directly or indirectly?
3. What neuromonitoring modalities do you regularly use?
4. Do you have real-time data interpretation?
5. And if so by whom?
6. Where is the person interpreting the data?
7. Does a Neurologist review the data after the surgery?
8. What qualifications do you believe the person interpreting the data should have?
9. How would you like your neuromonitoring to be run ideally?
10. What do you believe are the appropriate qualifications for a neurophysiologist?
11. Do you think it is safe for neurophysiologists / neurologists to remotely monitor more than one case at a time?
12. How many cases do you think could be remotely monitored at the same time (if any)?
13. As a surgeon would you be interested in participating in neuromonitoring training?
